Subject: S/047/036 Native Asphalt

I received a call this morning from Carl Minden of Native Asphalt. He wanted to update me on their project status. They had the area flown for an aerial map. The map should be available within the next weeks. They have scheduled site inspections for Sept. 6 with the BLM to look at the old SOHIO/BP/Native Asphalt exploration disturbances. They would like to reclaim those disturbances and at the same time reclaim portions of the Cameron #1 site to bring it under 5 acres. They would like to perform all this reclamation this fall. He would like to meet with the Division to discuss their reclamation proposal and diversion of the water. I told him I would be out Aug 25 - Sept 14. He will probably wait until after Sept. 14 to meet with the Division.
